Subject: About the DOJ vers Microsoft ... And District Judge J. Frederick Motz

Sirs,

The DOJ's feeble attempt to settle with Micosoft is the worst of cash power politics at the expense of the consumer... the voter.

Microsoft is a repugnant technological cancer. Ruthlessly run as an illegal monopoly.

And now I wish to oppose a settlement that has the company spending a billion dollars on seeding it's products in schools.

It's like asking a drug dealer to give away more drugs to hook more victims!

Microsoft should have spent a billion dollars on APPLE products for schools to endeavor to repair Microsoft's damage to the American technology environment!

Thankyou.

Pen Densham.

Citizen and Apple User
